

NEW FOR 2014

THE NEW NEWBOURNE 35FS MULTI FUEL STOVE

Nominal 3.9kW output

The Newbourne 35FS is the smallest stove in the Newbourne range and is ideal for installation into a small fireplace opening with a minimum size of 20" x 28" height. Although small in size, it is big in features with 80% efficiency, stylish good looks and excellent heat output. A full size curved door and large viewing window gives an impressive view of the fire burning beautifully yet efficiently in the firechamber. With a portrait design the stove is ideal for installation in canal boats, townhouses or country cottages, whether installed into a fireplace or a freestanding situation to warm your home and heart.

- ◇ Output range of 1.5 - 4.9kW
- ◇ Pevex clean burn technology
- ◇ Designed for multi fuel use
- ◇ Chrome cool-to-touch handle
- ◇ Optional 110mm and 160mm leg lengths available
- ◇ 400mm log store available

A World of Stoves, A World of Choice

New for
March 2013

From April 2013

The Newbourne 40FS (4.5kW) and 50FS (5.5kW) Multi Fuel Stoves Recommended to Defra for Smoke Exemption Approval from April 2013

The **Newbourne 40FS** and **50FS** are brand new cleanburn multifuel stoves which are available in a nominal 4.5kW and 5.5kW output ratings. The Newbourne stoves offer a sleek and stylish design with a full width curved door that gives an impressively wide view of the fire burning brightly in the stove. A beautiful nickel plated cool-to-touch door handle with a positive locking mechanism fitted to the door ensures a delightful operation when loading fuel into the capacious firebox.

The **Newbourne** stoves are designed with primary air control, secondary air wash to keep the glass clean and tertiary air to ensure clean burn high efficiency performance when burning wood or smokeless fuel.

These stoves will make a beautiful and stylish addition to any room setting with their smooth and good looking symmetrical lines whilst offering a lovely warm and efficient cosy controllable heat.

Exclusively available through authorised stockists throughout the UK.

NEW

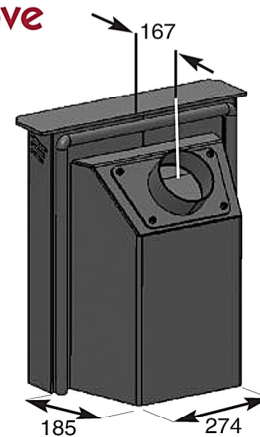

PEVEX SLIMLINE 30 3-5kW Inset Multifuel Stove

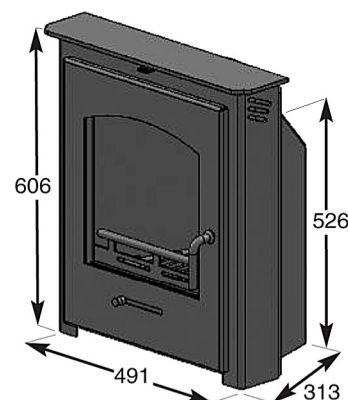

The new Pevex Slimline 30 3-5kW inset stove is designed to easily fit into a standard milner fireback. It features a narrow depth and a 45 degree angled outlet to enable fitting into a standard 16" x 22" fireplace opening and can either be installed with a liner (with optional bolt on flue adaptor) or flunched into the chimney.

The stove is designed for multifuel use and features a large glass window to give maximum view of the fire, primary and secondary air for precise control, full cast iron grate, convection sides and top plate and vermiculite lined fire chamber for improved combustion and improved efficiency.

Not only will the Slimline 30 look great in any fireplace but with an output of up to 5kW and an efficiency of 77% (net) it will be a huge improvement over a normal open fire.

optional bolt on 45 degree flue adaptor 127mm dia.
